EDUCATION

University of California, Riverside

Riverside, CA

Bachelor of Science in Computer Science

Sep. 2021 – April 2025

- Current GPA: 3.78
- Relevant Coursework: Database Management System, Introduction to Big-Data Management, Introduction to Software Development, Intro to Software Construction

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, React, React Native, Java, Python, C++, HTML, CSS, SQL

Developer Tools: Git, GitHub, Firebase, Cypress, Google Cloud Platform, GitHub Action, Maven

Technologies: Next.js, Expo, VSCode, PostgreSQL

EXPERIENCE

Software Engineer Intern

September 2024 – April 2025

Engineering For Good

Riverside, CA

- Developed a newsletter automation web application leveraging LLM technology for a non-profit, BlueHeart.
- Constructed solution architecture and design with BlueHeart client, ensuring satisfactory project requirements.
- Utilized **OLLama's LLama3.3 model** to auto-generate paragraphs from **Google Calendar Events**.
- Built web app using **Next.js's** full-stack framework leveraging app router for dynamic routing, server-side rendering, and seamless API integration.

Software Engineer

June 2023 – March 2025

Citrus Hackathon Committee

Riverside, CA

- Maintained a hackathon portal web platform, **managing 100+ attendees per event across 5+ hackathons**
- Automated **Cypress.io** UI component tests in **CI/CD** workflow, ensuring reliable frontend regression testing
- Converted protected pages to server components with **NextAuth** for server-side session management
- Reduced input lag by 50% using **Tanstack Virtual** virtualizing 200+ DOM items in forms and dashboard
- Enhanced user accessibility in the statistics dashboard after integrating **shadcn's Charts UI** library

Project Lead

April 2023 – January 2025

Association for Computing Machinery @ UCR

Riverside, CA

- Directed **frontend** website projects for **3+ UC Riverside clubs** each managing 10+ beginner developers.
- Reinforced best coding practices by creating a comprehensive **code review** workflow for 80+ pull requests.
- Managed project workflows and milestones using **GitHub** ensuring consistent and streamlined development.
- Led 10+ weekly meetings with the clients and UX/UI designer to discuss technical challenges and solutions.
- Instruct 10+ workshops involving web development tools **React**, **TailwindCSS**, and **Framer Motion**

PROJECTS

TripCreator | *Next.JS, React, TypeScript, Firebase, GCP*

github.com/seanquiambao/trip-creator

- A web application that enables users to manage and customize trips, providing an intuitive experience
- Utilized **Google Cloud Platform** APIs to fetch places and map data in a trip itinerary planner web app
- Designed a **NoSQL** data model using **Firebase Firestore** to efficiently store user and trip data
- Designed a scalable **Client-Server Architecture** for the web app, ensuring clear separation of concerns
- Implemented **API routes** using Next.js app Router to handle server-side logic and data interactions

BeatDrop | *Expo, React Native, Zod, TypeScript*

github.com/shahdivyank/beatdrop

- A **location-based music sharing** social media **Expo** mobile app allowing users to pin music to specific locations
- Designed a **Zod TypeScript-first schema** validating user profile input, ensuring data integrity and accuracy
- Leveraged Expo AV Library to develop a custom **React Native** hook fetching and playing music

Pizza Store Management System | *Java, PostgreSQL* github.com/seanquiambao/cs166_project_phase3

- Designed a **Java** command-line tool for a Pizza Restaurant management system alongside with 1 developer.
- Designed **PostgreSQL** relational schema for menu items, customer information, and delivery orders.
- Created indexes to optimize SQL query inputs, improving search and query performance by up to 40%.
